

Nlyte NgageAPI

DATA SHEET

NgageAPI™

NLYTE NGAGEAPI INTEGRATION MASTER KEY

Integrate to Nlyte through the powerful
NgageAPITM web API

The Nlyte NgageAPI is a standard system interface that results in quick integrations with the Nlyte DCSM solution. Whereas the competition may surround their DCSM interface with costly hardware or claim their integrations are off the shelf, Nlyte has a truly well documented API at no additional cost.

What this means is the Nlyte DCSM solution can rapidly interface with any integration partner's third party solution to enable customers to manage their IT infrastructure more dynamically than ever. The benefit of a well-documented API is the elimination of guesswork and expensive and time-consuming development.

Because the NgageAPI is a Web API, latency is reduced and security is improved. The NgageAPI is an evolved web service, using the latest in up to date technology.

NLYTE'S OWN BULK DATA MANAGER CONNECTS TO THE REST OF THE NLYTE DCSM SOLUTION VIA THE NGAGEAPI

Intelligent updates are delivered via the NgageAPI web service, which avoids overwriting your CMDB with error-filled asset data.

NLYTE'S OWN INTEGRATOR PLUG-IN FOR MONITORING ASSET INFORMATION CONNECTS TO NLYTE VIA THE NGAGEAPI

The Nlyte Integrator enables a variety of integration options for connecting devices and integrating applications with the Nlyte data center infrastructure management suite (largely using Modbus and SNMP protocols).

THE NGAGEAPI DIRECTLY UPDATES THE NLYTE CENTRAL REPOSITORY DIRECTLY FROM 3RD PARTY SOLUTIONS

The NgageAPI efficiently updates each database to enable both operational and business intelligence level access to the data center infrastructure power, space and cooling. All of Nlyte is 'driven' by the Nlyte Central Repository, and using the NgageAPI ensures your 3rd party solution will enjoy a robust integration with the Nlyte solution.
