

Case Study: Global 500 Financial Services Company

Introduction

This case study of a Global 500 financial services company is based on a March 2016 survey of Nlyte customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“Nlyte is simple to use with all functions required to model an IT room. It’s a central tool to model all aspects of the data center and to power connectivity to rack content, giving us confidence in the dependencies of assets when planning critical intrusive works.”

Challenges

- Describes the state of their data center management before adopting Nlyte in the following way:
 - Legacy, siloed approach to IT and data center service management
- Three biggest data center challenges before using Nlyte were the following:
 - Poor capacity planning
 - Lack of reporting and analytics to plan and forecast
 - No accurate asset inventory

Use Case

- Top criteria for choosing their vendor for data center solutions included the following:
 - Ability to improve capacity planning
 - Ability to provide visibility into key business metrics and data visualizations
 - Ability to optimize use of power, cooling, space and assets
- Found the following Nlyte capabilities to be the most valuable:
 - Capacity planning
 - Connection management
 - Ease of use

Results

- Realized the following benefits after deploying Nlyte:
 - Detailed location of all data center assets with total number of asset types known
 - Accurate and detailed data center capacity planning with confidence in capacity data
 - Improved global asset lifecycle management (“dock to decom”)

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Global 500

Industry:
Financial Services

About Nlyte

Nlyte Software is a leading software company focused on planning, managing and optimizing data centers.
