Nlyte Hosting Service
Reduce Your Costs and Resources

Nlyte Software

What is the Nlyte Hosting Service?

Nlyte Hosting Service is an extension of Nlyte's Enterprise On Demand (SaaS) offering and gives your organization flexibility in moving your Nlyte deployment to an off premise managed solution.

The Nlyte Hosting Service offers the flexibility to outsource the hosting to Nlyte, thus providing a significant reduction in costs while allowing your personnel to focus on higher value activities.

Nlyte Hosting Key Benefits

- Retain 100% ownership of your data without hassle or expense of managing the underlying hardware and software components

- Lower cost than maintaining the platform yourself

- No need to purchase and manage underlying hardware and software components

- Predictable total cost of ownership to run Nlyte Software

- Dedicated instance, so all data is air-gapped and secure

- Automatic updating, patching, and upgrades of Nlyte Software and its underlying infrastructure

- Increased flexibility in conducting business with Nlyte

- Remove need for a dev/test environment for validating patches and upgrades before moving to production

Nlyte Hosting Key Features

- Hosted in a DRaaS datacenter with Type 2 SOC 2 certifications

- Experienced personnel who manage your environment to keep it current

- Proven harden platform designed for performance and security with data encryption in transit and at rest

- Full support of all Nlyte connectors and integrations

- High availability with 24/7 monitoring, management, and performance
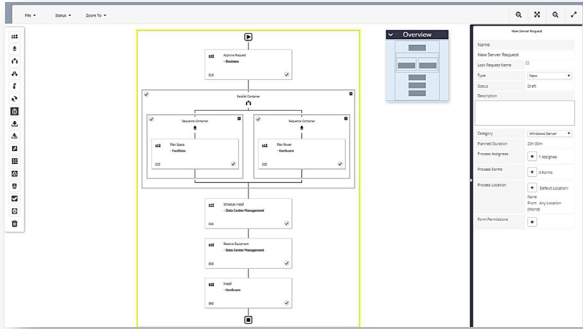

How Nlyte Hosting Works

Nlyte Hosting Service provides the entire environment where your DCIM deployment resides- maintaining the server, network connection, software components and updates of Nlyte software. You no longer need to acquire and maintain these infrastructure elements in house.
