

Augmented Reality Module

PRODUCT BRIEF

Whether you are managing a massive data center, supporting remote locations, responsible for a lights-out facility, or contending with the challenge of limited trained support staff, Nlyte's Augmented Reality module delivers skilled hands no matter how far away.

Nlyte's Augmented Reality solution delivers a new

level of remote management across the entire compute infrastructure. It will find and guide a user to a specific workloads rack and server. The user will see an overlay of the Nlyte user interface over the work environment using the HoloLens AR goggles, tablet, or smartphone. They can see reports, workload and asset dependency maps, room, isle, or cabinet hotspots, associated alarms, and more.

Augmented Reality Module

The Nlyte Augmented Reality Software Module provides an augmented experience using HoloLens 2 glasses for a hands-free experience. Or hands-on access through a smartphone or tablet. It allows you to:

- Find and guide a user to a workload running with a datacenter, rack, server
- Visualize Nlyte overlay reports against the real datacenter assets and racks, hot spots, Nlyte Energy Optimizer alarms, and more.
- Review and update workflow actions using hand gestures, the “Minority Report” experience

- Updating of Nlyte assets
- Assist in storage drive management – location and destruction of storage drives

Recommended Configuration:

- Processor: 2 cores or more
- RAM: 6GB or greater
- Windows Server 2012 or greater
- HoloLens 2 or HoloLens 2 with Dynamics 365 Remote Assist with MS Teams.
