
Optimize your Critical Infrastructure

NLYTE Hosting Service

Flexible, Scalable, and Secure DCIM Hosting

Nlyte Software

Nlyte Hosting Service is an extension of Nlyte's Enterprise On Demand (SaaS) offering, designed to provide organizations with flexible deployment options. Customers can choose to host Nlyte in their own environments or outsource hosting to Nlyte, enabling reduced costs, simplified infrastructure management, and enhanced operational agility.

Key Benefits

Lower Total Cost of Ownership
Avoid the capital and operational expenses of managing hardware and software infrastructure.

Predictable Costs
Fixed pricing model ensures budget stability and cost transparency.

No Infrastructure Required
Eliminate the need to purchase, maintain, or upgrade servers and software.

Automatic Updates & Patching
Always stay current with the latest features and security enhancements.

Increased Business Flexibility
Easily scale and adapt your deployment to meet evolving business needs.

Data Ownership & Security
Retain 100% ownership of your data with secure, air-gapped environments.

High Availability & 24/7 Monitoring
Enterprise-grade uptime and performance with continuous monitoring and support.

No Dev/Test Environment Needed
Validate patches and upgrades without maintaining separate environments.

Key Features

Centralized DCIM Repository
Industry's only contextual data center asset repository with interrelationships.

Patented Asset Placement Optimization
Maximize space and efficiency with intelligent asset management.

Integrated Business Intelligence Engine
Perform advanced "what-if" modeling and analytics.

Flexible Workflow Engine
Automate daily operations and long-term asset lifecycle management.

Capacity Visualization
Real-time modeling of space, power, and asset utilization.

Comprehensive Power & Network Management
Full visibility and control over infrastructure connections.

Prebuilt Integrations
Seamless integration with BMC, HPE, ServiceNow, VMware, Microsoft, Citrix, and more.

Robust Web Services API
Rapid integration with third-party applications.
