

IS YOUR DATA CENTER READY FOR THE FUTURE?

Nlyte Intelligence Operational AI

Conversational Intelligence for Data Center Operations

— Stop Searching. Start Asking.

 **Nlyte[®] Software**

“

Today operational intelligence must keep pace with real-time change. Nlyte Intelligence transforms natural language questions into trusted insight, helping teams act confidently across the data center.

”

From Question to Action — With AI

Nlyte Intelligence replaces static reporting with dynamic, conversational insights, allowing anyone to query the full Nlyte dataset in real time.

Natural language interaction across assets, power, cooling, space, and network data

Intelligent guidance and recommendations designed to accelerate informed decision-making

Real-time integration with Nlyte Energy Optimizer and Nlyte Asset Optimizer for always-current visibility

Secure, on-premise deployment: your data never leaves your environment

Expands the Potential Users of Nlyte Data

Nlyte Intelligence delivers value far beyond traditional DCIM users through conversational access.

Service Desk – Faster ticket triage and incident response

Finance – Cost analysis, depreciation, and capital planning

Asset Manager – Inventory tracking and asset lifecycle control

Facilities Engineer – Power, cooling, and maintenance visibility

Compliance / Audit – Risk management, audit trails, restricted access

Network Operations – Connectivity, port usage, and topology mapping

Data Center Manager – Capacity planning, utilization, lifecycle decisions

Intuitive Operation (Just Ask)

Ask Questions → Get Insight → Take Action

Ask

Operators ask **natural-language questions** about assets, capacity, power, cooling, network connectivity, or operational risk, without navigating dashboards or reports.

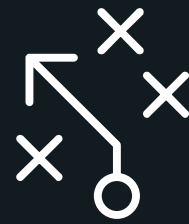

Nlyte Intelligence understands human questions and securely accesses on-premise operational data across IT and facilities.

Insight

Nlyte Intelligence correlates real-time data from across the Nlyte platform to surface clear answers, context, and impact with speed and clarity.

Insights are drawn from live asset, energy, and infrastructure data, replacing static reports with dynamic, conversational intelligence.

Action

Teams can act with **confidence using accurate, current insights**, resolving issues faster, optimizing resources, and making informed operational decisions.

From capacity planning to incident response, decisions are accelerated without manual analysis or human error.

Example Use Cases

Energy Consumption by Area – Monitor efficiency by room, cabinet or server

Capacity Monitoring – Identify power, cooling, or weight constraints before issues

Planned Switch-Over Impact – Understand risks before taking cooling offline

Available Cabinet U-Space – Quickly locate capacity for new deployments

Asset Maintenance History – Diagnose recurring issues faster

Network Topology Mapping – Visualize all connections for a specific asset

Outage Impact Analysis – Identify affected assets during power events

Asset Cost Breakdown – Analyze spend by location group

Asset Lookup in Tickets – Speed service desk response times

Transform Your Data Center Operations with Nlyte Intelligence

Replace reports with answers.

Empower every role with intelligence.

Make faster, smarter operational decisions while reducing risk.

Eliminates manual analysis and static dashboards

Democratizes access to complex infrastructure data

Reduces errors and accelerates issue resolution

Keeps all customer data securely on-premise
